SUMMARY

Electrical and Electronics Engineering graduate and Insight and Research Analyst with 3 years of experience delivering data-driven insights across the energy and healthcare sectors. Strong foundation in power system components and grid equipment, including transformers, switchgear, substations, and data centre electrical infrastructure. Skilled in primary and secondary research, Excel-based modelling, forecasting, and publishing technical market articles for industry audiences.

CORE SKILLS

- Power grid equipment research: distribution and power transformers, switchgear, substations, data centre electrical infrastructure
- Quantitative analysis: Excel modelling, forecasting, regression and correlation analysis, KPI tracking, data validation
- Research delivery: methodology design, survey design, qualitative interviewing, thematic analysis, requirements gathering
- Reporting: client-ready reports, dashboards, stakeholder presentations, webinar delivery, technical writing, and publishing
- Tools: Excel (PivotTables, advanced formulas), PowerPoint

SELECTED PUBLICATIONS

- Powering down progress: The impact of distribution transformer shortage on green ambitions in Europe — Transformers Magazine
- North America's Dynamic Power Transformers Market — PTR Whitepaper
- Decarbonization in the GCC Region: A Catalyst for Distribution Transformer Demand — Middle East Energy

(Full publications, whitepapers, and media appearances)

EXPERIENCE

Market Research Analyst

Power Technology Research (PTR) August 2023 – December 2024, California, US | Remote

- Delivered 20+ end-to-end market research projects across EMEA, APAC, Americas, and MEA, combining quantitative modelling and qualitative insights to support investment and business strategy.
- Produced and published regional transformer market articles and whitepapers covering Europe, North America, and the GCC, translating technical and policy drivers into clear market implications.
- Built Excel-based models using regression and correlation techniques to forecast demand, assess pricing dynamics, and quantify adoption trends in grid equipment markets.
- Conducted secondary research on OEM strategies, manufacturing footprint, and supply chain constraints across transformer ecosystems.
- Maintained and quality-checked an internal intelligence database tracking global manufacturer expansions, new facilities, and acquisitions in power and distribution transformer supply chains.
- Created 35+ client-facing reports and visual dashboards, presenting findings through webinars and stakeholder review sessions.
- Designed research methodologies and fieldwork plans, managing sample delivery to meet data quality requirements

Research Analyst

Insight Driven Research (IDR) July 2022 – July 2023, Islamabad, Pakistan

- Coordinated 15+ healthcare and diagnostics research projects, managing qualitative and quantitative data collection for international clients.
- Designed 25+ different surveys and conducted 40+ structured interviews with healthcare professionals, patients, and marketing experts.
- Delivered targeted sample lists to meet project needs, ensuring representative and valid datasets.
- Implemented non-traditional participant recruitment through social media (Instagram, Facebook, Reddit), improving hard-to-reach respondent engagement by 43%.
- Conducted on-site outreach to diagnostic labs across Pakistan, securing participation and collecting reliable data on medical equipment usage.
- Maintained a verified expert network of 100+ participants for ongoing research collaboration.
- Oversaw data entry, survey uploads, and respondent tracking, ensuring 80% timely delivery of validated datasets.
- Managed participant compensation and documentation, adhering to GDPR and ethical research standards.
- Directed data synthesis of 3+ complex healthcare projects quarterly using Excel, delivering actionable insights.

Copywriter & Public Speaking Coach

Freelance September 2021 – May 2022, Remote

- Delivered tailored coaching in communication and public speaking to clients from diverse backgrounds, enhancing presentation and analytical storytelling skills.
- Produced analytical content, including competitor research & keyword-optimized e-commerce listings, improving visibility & client engagement.

EDUCATION

Bachelor of Electrical Engineering (Electronics)

Air University · Islamabad, Pakistan · Sep 2017– Aug 2021

INVOLVEMENT

Joint Secretary

AIR University Islamabad, Pakistan · Protocol Society · September 2018 – August 2021

- Led awareness campaigns on harassment and mental health, engaging student communities on sensitive issues and promoting continuous improvement initiatives.
- Anchored and organized university events, coordinating with embassies and audiences of 200+, demonstrating stakeholder management and communication skills.
